

October 4, 2002

To Whom It May Concern:

I am happy to recommend JDR Consulting, Inc. for small and medium business computer needs. For the last several years the church office I managed utilized their services, and in October 2001, JDR Consulting was used to upgrade St. Bridget's computer system, networking, hardware purchase, and installation of software. They performed an excellent service to our office and solved many problems we had with networking.

In July 2002, JDR Consulting again was chosen to install a computer system in another church office, Saint Mary Magdalene, where I have transferred to. They installed the system as we were bringing in the desks. They have been very responsive to our needs and to our low budget. They are also very professional and amiable in their work.

I feel confident that you will find these fine young men at JDR Consulting very valuable in setting up and servicing your computer system.

Very Sincerely,

Patricia Wentworth  
Parish Manager
